MASTERING MODERN DEVOPS

Infrastructure, Automation, IDPs, eBPF, OTel & Cloud-Native Security (2nd Ed.)

Modern cloud-native engineering demands more than isolated scripts or manual ticket queues. In this thoroughly expanded Second Edition of Mastering Modern DevOps, Christian Chostak delivers a definitive, production-grade blueprint spanning foundational Infrastructure as Code through the latest cloud-native breakthroughs.

Inside this hands-on engineering guide, you will master:

- Programmatic Infrastructure as Code with AWS CDK v2, Boto3, OpenTofu/Terraform 1.9, Pulumi & Ansible
- Automated CI/CD Pipelines, OCI Artifact Registries, Docker Buildx & Kubernetes 1.31 Orchestration
- Internal Developer Platforms (IDPs) with Backstage Golden Paths, Crossplane v1.17 & Kratix
- eBPF Cloud-Native Networking with Cilium 1.16, Hubble, Tetragon & Istio Ambient Mesh
- OpenTelemetry Collector Pipelines, Continuous eBPF Profiling & AI-Augmented SRE
- Cryptographic Supply Chain Security with SLSA Level 3, Sigstore Cosign, SBOMs & Kyverno
